UNICLEAN LOW FOAMING

Highly effective, low-foaming alkaline cleaner for all types of soiling

Product Description
Uniclean Low Foaming is a powerful alkaline cleaner that effortlessly removes grease, oil, soot and other heavy soiling. Uniclean Low Foaming is ideal for use as an all-purpose cleaner in professional and industrial environments. Uniclean Low Foaming is completely solvent-free and is therefore less harmful than traditional solvent-based degreasers. Thanks to its low-foaming properties, Uniclean Low Foaming is ideal for use in (scrubbing) machines.

Uniclean Low Foaming is formulated using several ingredients derived wholly or partly from plants. At least 38% of the organic carbon in this product comes from renewable sources. At least 99% of the organic ingredients are demonstrably biodegradable, based on OECD/ISO test data and documented supplier information.

Use
Uniclean Low Foaming can be used on virtually all surfaces and in almost any situation, both indoors and outdoors. Uniclean Low Foaming is highly alkaline and may cause damage if used incorrectly. Take care with alkali-sensitive surfaces such as aluminium. If in doubt, always carry out a test first.

Characteristics
- Low-foaming
- Extremely powerful degreasing action
- >99% biodegradable
- Highly concentrated
- Solvent-free
- Suitable for general use

Technical data

Odour:	Lemon
Colour:	Light yellow
Specific weight:	1,02 kg/Litre
pH:	13,5 (undiluted)
Contains:	Potassium hydroxide

Application conditions
Uniclean Low Foaming can be used in all weather conditions.

Instructions
1. Dilute Uniclean Low Foaming depending on the level of soiling:
   Extreme soiling: undiluted
   Heavy soiling: 1:1 – 1:5
   Normal soiling: 1:10 – 1:30
   Light soiling: 1:50 – 1:100
2. Apply Uniclean Low Foaming using a low-pressure sprayer, brush or cloth.
3. Leave the product to work into the surface for a few minutes. Rubbing with a white pad or power sponge speeds up the process.
4. Wipe the surface with water and/or a microfibre cloth. If used undiluted, rinse thoroughly with clean water.
5. Repeat the procedure if necessary.

Packaging
1, 5 and 10 litres

Consumption
Consumption depends heavily on the level of contamination and the dilution used.

Practical information
- Do not mix with other products; take care when using acidic products.
- Suitable for scrubbing machines
- Take care with alkali-sensitive surfaces such as aluminium and linoleum. If in doubt, always carry out a test first.
- Dilute only with clean tap water, demineralised water or osmosis water.

Storage
Can be kept for at least 24 months in its original, unopened packaging. Store in a cool, frost-free place away from direct sunlight.

Safety instructions
This product is corrosive and may cause severe burns and eye damage. Avoid inhaling spray mist and wear suitable protective gloves, protective clothing and eye/face protection during use. In case of contact with the skin or hair: remove contaminated clothing and rinse the skin thoroughly with water. In case of contact with the eyes: rinse cautiously with water for several minutes; remove any contact lenses if this can be done easily and continue rinsing. Consult a doctor or poison control centre immediately. If in doubt, always consult the safety data sheet or our R&D department.

Technical support
Mavro is ISO 9001 and ISO 14001 certified. This means that quality and environmentally responsible practices are at the heart of everything we do, from our products to our expert advice. Our technical advisors and R&D team are always here to help. We're happy to discuss your challenges or specific requirements and find the right solution together. Whether it's a product from our existing range or a solution we develop specifically for you, we're here to help. Give us a call, send us an email or come and visit us!
