UNICLEAN HIGH ALKALINE

A highly alkaline cleaner for cleaning extremely soiled surfaces

Product description
Uniclean High Alkaline is a highly alkaline cleaner designed for heavy grease build-up, soot and other extreme soiling. Uniclean High Alkaline contains very powerful emulsifiers and surfactants and can tackle even the most stubborn dirt. Uniclean High Alkaline is completely solvent-free and is therefore less harmful than traditional solvent-based degreasers.

Uniclean High Alkaline is formulated using several ingredients derived wholly or partly from plants. At least 52% of the organic carbon in this product comes from renewable sources. At least 99% of the organic ingredients are demonstrably biodegradable, based on OECD/ISO test data and documented supplier information.

Use
Uniclean High Alkaline can be used on virtually all surfaces and in almost any situation, both indoors and outdoors. Uniclean High Alkaline is highly alkaline and may cause damage if used incorrectly. Do not use on surfaces sensitive to alkalis, such as aluminium and linoleum. Always carry out a test before use.

Characteristics
- Highly alkaline
- >99% biodegradable
- Can be used on most surfaces
- Less harmful to the environment than other strong cleaners
- Extremely powerful cleaning action

Technical data

Odour:	Lemon
Colour:	Brown
Specific weight:	1,03 kg/litre
pH:	14
Contains:	Potassium hydroxide, C9–C11 ethoxylated alcohols, hexyl D-glucoside, tetrasodium N,N-bis(carboxylatomethyl)-L-glutamate

Application conditions
Uniclean High Alkaline can be used in all weather conditions.

Instructions
1. Dilute Uniclean High Alkaline depending on the level of soiling:
   Extreme soiling: undiluted
   Heavy soiling: 1:1 – 1:5
   Normal soiling: 1:10 – 1:30
   Light soiling: 1:50 – 1:100
2. Apply Uniclean High Alkaline using a low-pressure sprayer, microfibre cloth or brush.
3. Leave the product to work on the surface for a few minutes. Rubbing with a white pad or power sponge speeds up the process..
4. Rinse the surface with water and/or wipe with a microfibre cloth.
5. Repeat the procedure if necessary.

Packaging
5 and 10 litres

Consumption
Consumption depends heavily on the level of contamination and the dilution used.

Practical information
- Do not mix with other products; take care when using acidic products.
- Do not use on alkali-sensitive surfaces such as aluminium and linoleum.
- Dilute only with clean tap water, demineralised water or osmosis water.

Storage
Can be kept for at least 24 months in its original, unopened packaging. Store in a well-ventilated, cool and frost-free place.

Safety instructions
This product is corrosive and may cause severe burns and eye damage. Avoid inhaling spray mist and wear suitable protective gloves, protective clothing and eye/face protection during use. In case of contact with the skin or hair: remove contaminated clothing and rinse the skin thoroughly with water. In case of contact with the eyes: rinse cautiously with water for several minutes; remove any contact lenses if this can be done easily and continue rinsing. Consult a doctor or poison control centre immediately. If in doubt, always consult the safety data sheet or our R&D department.

Technical support
Mavro is ISO 9001 and ISO 14001 certified. This means that quality and environmentally responsible practices are at the heart of everything we do, from our products to our expert advice. Our technical advisors and R&D team are always here to help. We're happy to discuss your challenges or specific requirements and find the right solution together. Whether it's a product from our existing range or a solution we develop specifically for you, we're here to help. Cive us a call, send us an email or come and visit us!
